Lab4: Workflow Container Type

- Open the UI
- Submit the Workflow using UI

```
apiVersion: argoproj.io/v1alpha1

kind: Workflow

metadata:

  name: cowsay-example

  namespace: argo

spec:

  serviceAccountName: training

  entrypoint: cowsay-entrypoint

  templates:

   - name: cowsay-entrypoint

     container:

       image: docker/whalesay

       command: [cowsay]

       args: ["hello from Argo!"]

  ttlStrategy:

    secondsAfterCompletion: 300

  podGC:

    strategy: OnPodCompletion
```

Try using Argo cli (copy above code in wf.yaml)

```
argo submit-n argo wf.yaml

argo list-n argo

kubectl describe wf cowsay-example-n argo

argo watch @latest
```
